

## Why Choose Deep Space Design?

Deep Space Design uses **smart technology** and **powerful analytics** to make **construction data management** easier. Our platform helps you **save time**, deliver **projects on time**, and stay **within budget**.

See how our solution fits your needs.

## Get in Touch

To find out more about how **Deep Space Design** can support your team, please contact us at [deepspacesync.com](https://www.deepspacesync.com)

# Design Management Made Easy

DEEP SPACE

Build With Data.

# Our Design Package

**Our Design Package includes high level applications tailor-made for Design teams to help you make Digital Construction super easy!**

## Design Coordination

Deep Space allows you to take control over your design projects. Quickly mark issues and assign them to specific team members, categorise them and assign deadlines to improve your design teams workflow and make digital construction super easy!

## BIM

Deep Space gives you full transparency in design with our Model Audit and LOI packages. Track and manage your project models and improve your teams performance. Deep Space helps you assess and create comprehensive reports for you and your team so you can enhance the LOI, Quality and Compliance of your design work, making design management super easy!

## Design Review

Categorise Trends to understand model growth over your project lifespan, access floor-by-floor room data, Gathering all Revit models with Sheets and have clarity over your project with an overview of all models using our Super Schedule App. The Design Review Package makes model management easy by allowing you to review all project models in one place.

# Starting from just \$499/month\*

*\*Includes 10 projects, unlimited users, no lock-in contracts, and unlimited data.  
(excl. GST)*

# Your Role is Hard

- Checking all design documents for compliance is time-consuming and prone to errors. (**13%** of working hours are spent locating project data)
- Coordinating different trades often leads to misalignment and rework. (Professionals can **waste** up to **13.4 hours** per week)
- Keeping BIM data accurate and compliant is a tough, detailed task. (**96%** of engineering and construction data goes untapped)

# How We Can Help You

**Our Design Package** saves **time** by **automating repetitive tasks** and **reduces risk** through **bulk data integration**, catching **costly issues** that might otherwise be overlooked.

- **Design Review and Compliance:** Deep Space automates the checks and points out what needs your attention.
- **Design Coordination and Integration of Disciplines:** Deep Space helps to quickly process and integrate data, catching issues early to keep everything on track.
- **BIM and Model Data Compliance and Management:** Deep Space automates the checking and management of BIM data, making sure everything is correct without you needing to double-check.
